

Go Nuts!!

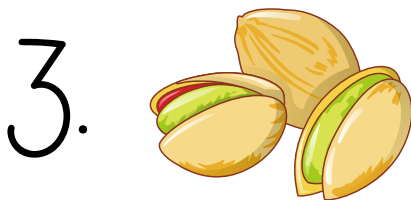

Match the picture of each nut to its name! See how many nuts you can correctly identify

Pistachio

Walnut

Peanut

Almond

Coconut

Cashew

Did you know...

- Most nuts grow on trees and bushes, but some grow under ground like the peanut!
- They also all have a hard shell that you have to break open to get to the nut!

Coconuts grow on palm trees and are green before they ripen and turn brown

Almond trees flower like this before they grow almonds

Cashews grow on trees outside of what's called a cashew apple

Peanuts sprout a plant above ground, but the peanuts actually grow in the dirt down below
